VOTE CLIFF BOWEN CPPT

Our sector needs a strong, member-led voice that listens, unites and wins for Members

Our sector is in the fight of its life. I've worked tirelessly on the EC to defend our industries, jobs, and communities and taken members' concerns directly to decision makers who must fully understand our workplace challenges.

Working with governments and international unions on decarbonisation, net zero, green energy & skills has ensured members' voices are heard where decisions affecting their livelihoods are made.

Whether its Lindsey Oil Refinery, Teesside, Grangemouth, or the North Sea, thousands of workers are being cast aside and communities are being devastated by policies that are decarbonisation through deindustrialisation.

Our sector deserves a future built on investment, not abandonment. If re-elected, I will continue fighting for a just transition; protecting jobs, strengthening our industrial base, and delivering real security for our communities.

I will help ensure power is in the hands of the members.

Why Us?

With the cost of living skyrocketing, our jobs being outsourced, many of us facing redundancy and with the increasing threat of AI, Unite members urgently need a strong, united union that has our back — and wins for us.

We will make sure the Executive Council comes together to solve problems and put **members first**. The union belongs to us, the members, and we need it to be a united and effective force for change.

MEMBERS UNITED will grow our membership, build a fierce industrial presence, and ensure a strong **Member led** voice that always stands up for workers.

WINNING AT WORK — An industrial strategy that puts winning at work and sustainable organisation at the heart of our union, with elected reps deciding what's best for their Workplaces with no member left behind.

AN INDUSTRIAL APPROACH—Clear industrial priorities should be set by the membership in every sector, working with our industrial officers both regionally and nationally.

STRONG FINANCES — Our union's finances must be sustainable so we can deliver tomorrow as well as today. Members need to know how their money is spent, and subs must be proportionate and affordable.

A MEMBER-LED UNION — with an Executive Council which will be the voice of UNITE members; holding the Administration to account, ensuring policy is followed, decisions scrutinised, money spent wisely, and punching its weight in the workplace and society.
