VOTE MARTIN FOSTER

ENGINEERING MANUFACTURING STEEL

Our Sector needs strong, member-led voices, to fight and win for Members

I'm seeking votes to be your Executive Council delegate for the Engineering, Manufacturing & Steel sector (EMS).

I've have worked at British Steel for the last 23 years. I am Treasurer and Secretary of my branch, been a Workplace rep/safety rep/ULR for 21 years, 13 years as full time Convenor, Chair of EMS RISC & NISC (delegate on both for 13 years), Vice Chair of Base Metals Advisory Committee & delegate on the CSEU EC.

Being elected to represent members is an immense privilege and to represent you on the EC would be the biggest privilege of all.

There's been much division in our union in recent times, along with a weakening of our political influence, which has been detrimental to our membership and communities.

If elected, I pledge to:

- **Work to rebuild unity** within the EC and across the wider union, so that we a union run by the members, for the members
- **Act in the best interests** of the membership
- **Hold Unite's leadership to account** for its actions and decisions
- **Work to strengthen** our political influence

Our union needs to rebuild that wider solidarity and strength, not just within Unite but with other unions too. The division within Unite must end. I'm committed to rebuilding our unity and strength.

Our success at British Steel proves cross-union solidarity and unity works, resulting in the protection of jobs and increases in pay. We're stronger united than divided and the members must ALWAYS come first.

Why Us?

With the cost of living skyrocketing, our jobs being outsourced, many of us facing redundancy and with the increasing threat of AI, Unite members urgently need a strong, united union that has our back — and wins for us.

We will make sure the Executive Council comes together to solve problems and put **members first**. The union belongs to us, the members, and we need it to be a united and effective force for change.

MEMBERS UNITED will grow our membership, build a fierce industrial presence, & ensure a strong **Member led** voice that stands up for workers.

WINNING AT WORK — An industrial strategy that puts winning at work and sustainable organisation at the heart of our union, with elected reps deciding what's best for their Workplaces with no member left behind.

AN INDUSTRIAL APPROACH—Clear industrial priorities should be set by the membership in every sector, working with our industrial officers both regionally and nationally.

STRONG FINANCES — Our union's finances must be sustainable so we can deliver tomorrow as well as today. Members need to know how their money is spent, and subs must be proportionate and affordable.

A MEMBER-LED UNION — with an Executive Council which will be the voice of UNITE members; holding the Administration to account, ensuring policy is followed, decisions scrutinised, money spent wisely, and punching its weight in the workplace and society.
